

Custom Planted Garden Pottery **NEW**

creative recipes for individual designs

A new and very popular program is custom designed containers and planters. Our designer chooses a combination of annuals, perennials even tropicals and shrubs to form an artistic display blending colors, texture and beauty to last through the season.

We will design custom planters for you with your pottery or you can choose from our large selection in the Pick up Area. Creating new looks for every season is made easy, we do the design and planting for you. This can be an instant garden where space is limited or a grand poolside oasis; any area can be transformed into a living pocket of color.

This is also a lovely thank you or appreciation offering to your best customers or employees. We offer unique pre-planted containers and the custom design service through the four seasons including Christmas.

Create a mini garden with themes of species like these succulents. Perfect for decks or entryways.

Autumn and Christmas planters pre-planted or you choose the materials and we'll plant it for you.
